

# Integrated VTC Camera SHELF

The FREEPORT Integrated VTC Camera Shelf is designed to provide

- Signal Buffering
- Camera Power Regulation and Protection
- Room Status Indicators

Panel mounted LED indicators display to users when key operations are in effect.

- Video Call in progress
- Audio Call in progress
- Microphones enabled
- Recording in progress

The FREEPORT Camera Shelf provides independent camera control via ethernet IP. Camera Shelf connection to rack mounted camera interface is made via Cat5/6 cable.

For more information about the FREEPORT Integrated VTC Camera Shelf and associated equipment, contact [sales@freeporrttech.com](mailto:sales@freeporrttech.com), or call the number below.
