

MD-VNS

Multi-Domain Video Network Switch

- Approved security procedures are assured when using a single codec across networks of differing security levels
- Meets all current DISA requirements and future feature requests as detailed in the SECURITY TECHNICAL IMPLEMENTATION GUIDE (STIG) dated January 2008
- True Red / Black air gap separation and isolated grounds between networks and system components
- Redundant security measures ensures the Classified Network and associated sensitive information never touches the Unclassified Network
- Scalability - Can be configured to operate across up to 7 separate videoconference networks (5 IP, 2 optional ISDN)
- IP and ISDN capable in a single solution
- Designed for stand-alone operation or can be fully integrated into complex Conference Room implementations
- NIAP approved fiber optic isolation between multiple data networks
